

# English Presentation by Andrea Cerio 28.03.2025

## TRANSCRIPT

### Slide 1

My name is Andrea Cheerio. I am the global leader 6 star of Amplivo senior coordinator for the core Shell group and Executive director of the Corcel Foundation.

Welcome. In this meeting, we will show you we discover the business most ethical, powerful and exclusive in the world,

### Slide 2

What we will see in this presentation. The problem we speak about, the problem of the plastic pollution, the second biggest problem in the world.

I will show you the solution regarding the core cell group International. I will show you a revolution, the CSR 25 plastic credit.

And I will show you a great opportunity. The business and people.

### Slide 3

Before I start, we are independent partner of AMPLIVO. We offer a plastic waste removal service, not a financial product. The CSR plastic credit is a digital receipt, which corresponds to a specific quantity of plastic recycled from the environment. No financial licence is required for its sale.

### Slide 4

This is a case study of the WWF you can find in their site your plasticdiet.org. The men in just approximately 5 grammes of microplastic every week. Let's see this short video.

### Slide 5

The Corsair group provides a solution to the pollution from plastic waste using chemical recycling, a process called penalises coarser converts. Plastic waste in advanced bio oil. This oil has a similar characteristic to crude oil and can be used as a raw material for the production of new plastic products.

During this process, we have control emissions because the process takes place respecting the international standards.

High quality oil with low sulphur and CO2 content and there is a huge demand of this oil because of the new European and international laws.

### Slide 6

Corsair is a three years ISCC plus certified company, the ISO C Plus certification ensure that the company satisfies environmental sustainability and social requirements recognised worldwide. This is the most important certification you need if you want to sell your oil to big company.

### Slide 7

At the moment, the Corsair has two operational facility the Bankgkok one and the Bangkok two in Bangkok, where we have 3 operational plans from 2020 and we have now 5 new plans in installation phase in a total area of 22,000 square metre.

And from now to the end of the year, we will have 20 plants up and running in Bangkok 1, 10 and Bangkok two, another 10.

Video – Corsair visit – 02:00

### **Slide 8**

We have even new facility in Europe already operational in Finland and we there we have one operational plant and another three plants in installation phase, and 10 plants will be up and running from now to the end of 2025 in a total area of 59,000 square metre, with the capacity to have 50 plants there and the capacity of 45,000,000 litre per year.

### **Slide 9 (Map)**

These are the project operational projects from the Corsair Group and the ones who are under development at the moment with Finland, Sri Lanka, Bangkok 1 under development for 2024 Bangkok 2 Sa Keo Thai North, Thai, South, Holland, Canada, United States and South America.

And the final goal for 2030 of the Corsair Group are 2.5 billion litre every year of pyrolysed oil.

### **Slide 10**

We did some important partnership starting from 2024. Huayin and Baston Group leading company in the production of pyrolysis systems supporting the industrial development of Corsair Group International. This collaboration began in 2024 with the acquisition of 23 new pyrolysis plants.

### **Slide 11**

Another important partnership we have with Corsair is with the Count Group, Count energy trading, one of the leading oil brokers in Europe is a buyer of a pyrolysis oil from the Corsair group since 2023 and they sell this oil to the major plastics producers around the world.

### **Slide 12**

And of course, our most important partnership for the Corsair group is Shell, Europe and Shell Asia. So Corsair Group International since 2024 sell its pyrolysed oil to Shell Singapore and to shell Chemical Europe.

### **Slide 13**

Corsair Foundation. We support people who are in in difficulties starting with the Bangkok community help. We support people who living in extreme poverty condition by giving them food and funding homes where they can live.

The plastic catch is another initiative in collaboration with the seven Thai Fishing Association. More than 100,000 fishermen, we collect plastic from the ocean, and we deliver to our facility in Bangkok where we transform it to pyrolysis oil.

Trash for cash is other initiative. We donate money in exchange for plastic waste collected in the poorest areas of Thailand.

### **Slide 14**

These are only a part of all the partnership with Corsair has at the moment in Thailand, in Asia and in all Europe.

## Slide 15

We were invited, me personally, in the European Parliament in Rome in on April 2023.

Corsair is a guest at the European Parliament to present its industrial solution. The main national media, Taiwan press, have testified to the importance of this great event.

Video 3 01:35 (female voiceover)

*“Land protection and sustainable economic growth plastic into advanced biofuel. Here is the innovation that Corsair Group introduced in Parliament.*

*Corsair group of companies and in just two years is revolutionising the market.*

*Ahead of the course, array group, Andrea Serial took a seat at the guest table in the.*

*Flag Hall of The European Parliament in Rome, there is a main office in Europe in the Netherlands and another office in Thailand. We employ about 100 people.*

*In our various offices, the year 2023 will be very important for us because we have made agreements with world class partners.*

*Got it.*

*Or you could save that.*

*Today, with sewer is the first company in Southeast Asia in the world of chemical recycling. We are one of the top three companies worldwide.*

*Yeah.*

*This innovation is not only about transforming plastic into this advanced biofuel, but also about the world of plastic credit, a younger sibling of carbon credits.*

*Individuals, companies and entire states have the opportunity to reduce their plastic footprint, become plastic neutral, eliminating the same amount of plastic that was introduced.*

*At the end.*

*It's like.*

*With the war.”*

## Slide 16

A lot of media and the world talk about us Corsair and CSR plastic credit have attracted the attention of hundreds of media from around the world. Global media reports that the continued growth of the Corsair group, like Yahoo Finance, Law, Vanguardia, Fox, Morning Star, Boston analytic, Euro and others.

## Slide 17

So now let's start about the let's to speak about the revolution. The CSR 25 plastic credit. But to understand the greatness of this company and this project, it is essential to take a step back and let's pick just a few seconds regarding the carbon credits market, the carbon credit market. It was born with the Kyoto Protocol in 1997 with the aim of reducing greenhouse gas emission. The CO2, which is the biggest problem in the world.

The new plastic credit market is like a little brother of the carbon credits, which, with private, private and companies can eliminate their plastic pollution.

#### **Slide 18**

This is a big information from Yahoo Finance's \$1.4 trillion, traded inside the carbon credit market just in 2024, and the estimation of this market is \$2.3 trillion within 2028

#### **Slide 19**

Offsetting one tonne of CO2 through the carbon credits in 2025, in the beginning cost \$5 for one carbon credit. Today, the seven certification cost \$60.00 because the price of the service carbon credit followed to increase and in the same way will happen to the plastic credit.

#### **Slide 20**

Marketing projection by two thousand 2728 the plastic credit market will be the 10% of the carbon credit market, so 2.3 trillion. The 10% is the market in the next three to four years of 230 billions. The Corsair Group International at the moment is the world leader company in the plastic credit market.

By two thousand 2728 with just the 10% of this market, Corsair could reach an annual turnover of \$23 billion per year.

#### **Slide 21**

Even the WWF speak about the plastic credit what? Which is the definition of the plastic credit from the WWF.

It is a transferable unit representing a specific amount of plastic collected from the environment and possibly recycled, and this is perfectly what we do. But we not only collect we 100% recycle this plastic.

#### **Slide 22**

What are the CSR 25 plastic credits? They are digital receipt, recognised worldwide that certified the removal of plastic waste from the environment. They operate in an open source, highly transparent and reliable database called blockchain. Every CSR 25. and every and every transaction is publicly recorded and can be viewed by anyone.

#### **Slide 23**

So what we do is completely transparent.

What you can do for the planet today, thanks to the Corsair Group, international individuals and company can offset their plastic pollution.

How? By purchasing our plastic waste removal service and receiving CSR 25 plastic credits.

#### **Slide 24**

Distribution of this CSR 25 plastic credit for each kilogramme of plastic waste recycle from the Corsair group. 10 CSR 25 plastic credits are released on the market, so the most important rule you have to remember is 1 kilogramme are 10 CSR.

## **Slide 25**

This process is being certified by one of the world's leading company. This is the Control Union since 1920, certification and inspection services on the market with over 274 offices and laboratories in over 80 countries worldwide.

## **Slide 26**

And how to become plastic neutral?

First step, Corsair recycles plastic waste worldwide through certified supply chains. Second step for every kilogramme of recycle plastic the Corsair releases into the market 10 CSR. 25 plastic credits. The third step individuals and company purchase our plastic waste removal service to offset their own plastic pollution. Let's make an example. If you want to remove 1000 kilogramme of plastic waste, you need to buy 10,000 CSR 25 plastic credits.

## **Slide 27**

And how to receive the CSR 25 plastic credit? You can go directly on the public market at the market price, for example, in L Bank, one of the top 20 world exchange.

## **Slide 28**

Or you can go through the network and buy these plastic neutral packages that with this plastic waste removal service at a lower price rather than the market, where are they?

But in 20 months, the courser will recycle, will recycle the plastic expected by choosing service and will gradually deliver the CSR 25 plastic credits.

## **Slide 29**

Global brands, who are already used plastic credits company like Nestle, Microsoft, Starbucks, that known as Tetra Pack, PepsiCo, Unilever and all the other. They are already involved in this market because the plastic credit is the only way today to do something to offset the plastic waste pollution.

## **Slide 30**

And these are international, some of the international brands partner who already used the CSR plastic credits like Diversity, BDMS, Marriott, Locksley Error, one group, the Totti soccer school, Gioiella and others.

## **Slide 31**

What are the benefits for a company?

Sustainable brand. You can communicate a commitment in the fight against the plastic waste pollution.

Tax advantages. The cost of this service can be deducted from the company's expensive.

European and international regulation force Company today to create a sustainability plan even for future years.

### **Slide 32**

This is the Gioiella company. It is a major Italian dairy producer with products sold through Europe. They have removed 3.5 mill 3.1 million, kilogramme of plastic waste from the environment by purchasing and retiring the CSR.

### **Slide 33**

Top Team soccer school, the Italian Football School of the world champion Francesco Totti became the first soccer school in the world, completely plastic neutral with the CSA basic credit.

### **Slide 34**

Today the CSR Plastic credit is the most selling in the World.

### **Slide 35**

So you can be part of the solution and you can be a pioneer in this revolutionary business.

### **Slide 36**

Simply signing up on our Amplivo platform, just request the link from the person who invited you.

### **Slide 37**

Then when you are registering in Amplivo network you can activate your business licence. The activation costs 10 euro every year and then you become a partner and you start to get to receive commission and now you are free to start in our business, you can sell our plastic waste removal services packages. The Amplivo network is active worldwide.

Ask information about the compensation plan your reference contact as the material explaining the compensation plan you receive important Commission on your personal sales and those of your group.

### **Slide 38**

So join the mission.

You will help us to clean up our planet from plastic.

You will be a part of the world's leading company and private partners active in dozen of country worldwide, an ethical and exclusive business unique in the world. Thank you very much.
